DAHLIAS

CLASSIFICATION OF DAHLIAS.

CACTUS DAHLIAS are distinguished by their long, twisted or pointed petals.

DECORATIVE DAHLIAS include loose flowering varieties which are full, or nearly full, to the center with broad, nearly flat petals.

SHOW DAHLIAS apply to those varieties producing large, round, quilled, well formed flowers showing only solid colors, but many frequently have shaded tips.

FANCY DAHLIAS include nearly all round, variegated, quilled varieties, although the lines are not definitely drawn between the Show and Fancy varieties.

POMPON DAHLIAS. This class embraces the small, round, miniature Dahlias, the plants of which are generally of the dwarf habit.

PAEONY FLOWERED OR ART DAHLIAS are of immense size and have two or three rows of petals.

SINGLE DAHLIAS have but a single row of petals.

COLLARETTE DAHLIAS. This class of Dahlias have one row of petals like single Dahlias, and in addition have a collarette of small petals around the yellow center of the flower.

NOTE.—There are different opinions about the division of some classes, and the above rules apply in general terms.

We supply all dahlias in strong roots, but as the season advances and our supply in this form becomes exhausted, we will send live, growing plants instead. These give good results.

Many experienced planters planting growing plants only.

Our dahlias are selected from hundreds of kinds, and are among the best the world has produced. We have many kinds not catalogued. Please send your order for anything that you want.

Order early and send cash with order, by Express, P. O. Money Order or Registered Letter

The earlier you send your order the surer you are to get what you want. Send now.

We think we can please you.

CULTURAL DIRECTIONS.

A sandy or light soil is best for dahlias, but they will do well in any soil not too wet. Spade and lighten the soil thoroughly one or one and one-half feet deep.

In this latitude plant from May 12th to June 30th. Do not plant near trees. Plant in a good sunny situation. Dig holes eighteen inches deep, put in six inches of rotten manure and cover six inches deep; lay the bulb on its side and cover lightly at first and fill in later. If the ground is naturally moist plant near surface and cover with sand. Dahlias like lime and cut worms do not. Protect from cut worms by putting a paper collar around the dahlia stem as soon as the stem begins to show. Try digging Mr. Cutworm out.

Look for cutworms as soon as the sprouts show above ground.

EDW. F. DWYER & SON, LYNN, MASS.

Shake the bush to find those pesky flies you must spray with pyrox.

Plant ponpons 2 by 2½ feet and others 3 by 4 feet apart. Keep the soil light and free from weeds. Dahlias enjoy having their foliage sprayed often. Do not let the soil dry more than two inches deep and do not keep the ground wet all of the time.

Grow to one stalk only.

Water by making a small furrow and running the water in the furrow from one plant to another. We trim out every other branch and two thirds of the buds. In August and September keep the ground covered with a heavy mulch of stable manure or a small handful of ground bone and nitrate of soda, four parts bone and one part nitrate of soda. Wood ashes are good, or get some good commercial fertilizer and apply a good handful every two weeks, beginning late in August and continuing to October.

Dahlias will not do well without proper care.

It is your care and skill that give results to be proud of.

Guarantee

We guarantee all tubers true to name, and their arrival in good condition with one or more sprouts or eyes showing life. We take great pains and carefully inspect every tuber before we send them out, but if on arrival you find any defective and will kindly return same to us, we will gladly replace them, free of charge. Our responsibility then ceases. Cash must accompany each order. Cover with damp earth as soon as received or we cannot guarantee them to grow. Place your order early, directing us when to send them.

- 4211 MYSTERY (E.F.DWYER) This dahlia is a marked improvement on Souv. G. Doazon which it resembles. The color is better, not so brickey in shade, the petal is finer and the centre is better. It sometimes comes with every petal uniformly and distinctly tipped with white and shading very nicely with an intermediate or pinkish color to red. In these colors it is the very best we have yet seen for anything of this description. As one grower said, "It is deserving of a gold medal." Another offered us \$4.00 for a single clump. We have grown this dahlia several years hoping to get a large proportion of the flowers to come with this most beautiful combination of colors. This is a mystery we have been unable to solve and if you would like to try it you can have a bulb for .35
- 422 MAD. MARZE—new, a magnificent large, pure white, of faultless form. By some considered to be the best white decorative35
- 4220 MRS. J. GARDNER CASSATT. A large-flowered variety of elegant shape, mauve-pink of a shade that is very pleasing in a Dahlia; a fine cut flower25
- 423 MME. MARGUERITE DES BLANC. An enormous, white cream center; very large, wide petals. 3½ ft.35
- 4230 MONT BLANC. An early, free, continuous flowering creamy-white on good stiff stems. One of the most important cut-flower varieties25
- 424 MAD. BUREL—soft pink heavily stripped crimson,35
- 4250 MAMMOUTH. A very large flower, frequently 7 inches in diameter on good long stems of a bright scarlet35
- 426 MME. LOUISE PERRIER—semi-double, a very attractive flower, distinctly larger than M. Lumiere which it resembles, clear carmine with white edge,25
- 4260 MME. VAN DEN DAEL—a charming, soft rose, with deeper markings, shading to white in centre. A very satisfactory dahlia,25
- 4270 MME. HELENE CHARVET—an enormous flower with very wide petals, color pure white; useful for large decorations,25
- 429 MAROCCO—rich, deep purple, strongly marked white. A very striking novelty.25

P Cactus

150	PARZIVAL. A splendid cream white; a free and early bloomer, on long, stiff stems25
152	PINK PEARL—mallow pink, changing to white at tips. Very fine for cutting,25
155	PHOENIX. New, color a deep rich, carmine red, each petal when opening having a broad stripe of cardinal red through the center; a most brilliant and rich color combination, and very distinct35

P Decorative

450	PAPA CHARMET—very large flowers of a beautiful deep crimson maroon. The finest and grandest dahlia yet offered of all the dark decoratives. Stems long. First class for cutting25
451	PAUL DAVID. Sometimes classed as a show dahlia. It is an immense pure red flower and in the very front rank as a first class exhibition dahlia. Stems long, blooms freely, good cut flower50
	PHENOMENE—salmon suffused light amber,25
453	PERLE DE LYON. A lovely white flower of good size on long wiry stems. The flower is splendid, but with us it does not bloom freely. It has been recommended as the very best25
455	PROFESSOR MANSFIELD. A quite large, fancy dahlia. The color is unique and striking; a rich yellow with white tips and markings of rosy red in varying proportions. Stems rather short, good size when suited20
456	PERLE DE TETE DORR. Pure white; petals split at tips; good cut flower15

PAEONY FLOWERED

BERTHA VON SUTTNER. Color beautiful salmon pink, shaded yellow; the flowers are of elegant form and carried erect. The plants are very sturdy with long stems and immense flowers, born freely, 4 ft.50
CLEOPATRA. Oriental red; base of petal yellow, shading to bronze red; very showy. 4 ft.....	.25
DR. VAN GORKEN. White stained lilac.....	.25
GEISHA—the most showy and striking dahlia of any class we have yet seen. The plant is of exceptionally strong growth and the foliage is distinctly different from any other. It is difficult, if not impossible, to find two flowers alike. Flowers are immensely large and the wide long petals are very fantastically twisted and curled in combination with a rich coloring of scarlet and gold that altogether makes a remarkable show. It is also among the very freest of bloomers, putting its flowers on long, wiry stems high above the foliage,50
GERMANIA—brilliant strawberry red, fluffy and artistic, good stems,25
GLADYS. A much improved form of 20th century; of large size, retaining its bright color throughout the season; center of petals brilliant rose crimson, with rose pink on either side and snow white center surrounding the yellow disc.....	.25
HAMPTON COURT. A bold flower of good form; of a bright mauve pink. One of the best yet introduced	.50

Fine Paeonies

FESTIVA MAXIMA. Is the Queen of all. We have grown them seven inches across; a glorious form, flecked in center with crimson. One of the best ever grown50
FRANCIS ORTEGAL. A very large, deep crimson.....	.50
PLUTARCK. A satin crimson, exceedingly brilliant and striking, with pond lily fragrance.....	.25
FAUST. A nice lively pink.....	.25
DUC DE NEMOURS. A splendid rosy pink; very free bloomer35
MAD. DE VERNVILLE. In color very similar to Festiva Maxima, but is not quite as large, and stands the storm and winds well, as the stems are strong. It has a chaste beauty all its own; fine, a wonderful bloomer.	.35
QUEEN ESTHER. A delicately beautiful, very free blooming variety. Color, light pink, form enchanting....	.35
DORCHESTER. A large flower with a most beautiful cream, shading to pink. The form is elegance personified50
OFFICINALIS RUBRA. This is the old fashioned paeonia of our own great grandmother garden. Color, deep rich crimson, like a Gen. Jack rose.....	.25
MAD. CALOT. Late bloomer; cherry red.....	.25
PINK AND WHITE. Outer petals pink; inner petals white25
EUGENIE VERDIER. Flesh pink, shaded white.....	.25
MAD. BOLLET. Large, very double rosy pink, white, reflex. Good35
SINGLE PINK. A lovely shade of pink, and makes more show in the garden than the doubles.....	.25

SIBIRICA ORIENTALIS "SNOW QUEEN". As a strong, free growing Iris, this new variety possesses all the merits of the type, differing only in color, which is pure white.

SPECTABILIS. Light and deep violet-purple. Early.

TRAUTLEIB. (New). A lovely, uniform, soft rose .

YELLOW with purplish veining in falls.

Double Hollyhocks

Hollyhocks are usually catalogued as hardy. We list them as biennials or triennials. The single, especially, and sometimes the seeds of the double kinds come up most anywhere in the garden, and flower the second year. The plants we offer are from the seed of the celebrated Chater strain, and will bloom this year, as they are extra heavy and strong roots. We have—

White, Pink, Yellow, Flesh White, Red and Maroon at 15 cents each; \$1.50 per dozen.

The new Clematis, "Ina Dwyer."

THIS NEW CLEMATIS is a seedling originating in the gardens of E. F. Dwyer & Sons, Lynn, Mass. The flowers measure fully two (2) inches across and are poised on long stems well above the foliage, having 25 to 50 beautiful, sweet scented flowers to a stem.

The blossoms are white shaded to a blue on the edges and tips of petals, being produced in marvelous profusion. As the petals mature, they fall off leaving the vine neat and attractive at all times. This is a valuable feature as well as the fact that it blooms at a time (from the first to the last of August) when there is no other vine in flower that rivals it in beauty.

Should bloom the same year it is set out.

It is an exceptionally strong grower, thickly covering a trellis 9 feet high and 10 feet long.

The Massachusetts Horticultural Society has awarded it a First Class Certificate by unanimous vote of its committee.

Price 50 to 75 cents.

LE MAIDI. Violet blue, probably the best of this color. 2 ft.....	.15

HARDY CHRYSANTHEMUMS

The so-called hardy Chrysanthemums are not reliably hardy in this locality, but the varieties listed here will usually come through all right as they are selected from the best and hardiest, kinds but must have some protection, or the clumps may be lifted at any time after they are through flowering and before the ground freezes, placed in a box with sufficient earth to cover the roots well and kept in a cold cellar. We have them in—

Red, White, Yellow, Pink and Brown. These are all varieties that we have found very good and desirable. Price 15 cents each; \$1.50 per dozen.
